ABOUT ME

If i may write what it mean programming in one only word, i would say: ART. I glad learn because every time i feel that I'm close to that new art. With the software programming always we will amazed. Now my life have sense. We borned in this point of the history for be programmers. The world needs us.

I started to learn about Programming Fundamental since the 2018 year. With languages such as Java, Python and whole about Web Development for example html, css, javascript, flexbox, bootstrap, angular. Also i've learned frameworks for production such as Django REST and Node.js.

Between 2020 and 2021 i had the opportunity through government of Colombia make 800-hour of learning of programming skills, more other courses in virtual platforms like Platzi. All the certificates are in my profile on LinkedIn, i will leave the link in this curriculum vitae. Nowadays i did a deepening in development mobile applications which is certified for the National University of Colombia.
